The Diceware™ Word List

Diceware lets you make highly secure passphrases that are relatively easy to remember. To use the Diceware list you will need one or more dice. Dice come with many board games and are sold separately at toy, hobby, and magic stores. Toys"R"Us in the US sells a package of five dice for about $0.99. You can purchase five "casino-grade" dice online from Casinocom.com for about $11.

First, decide how many words you want in your passphrase. We recommend a five word passphrase for use with PGP, S/MIME and similar encryption programs. For the paranoid, a six word pass phrase will make attacks on your passphrase infeasible for the foreseeable future. If you want to understand why, see the Diceware FAQ at www.diceware.com.

Now roll the dice and write down the results on a slip of scrap paper. Write the numbers in groups of five. Make as many of these five digit groups as you want words in you passphrase. You can roll one die five times or roll five dice once, or any combination in between. If you do roll several dice at a time, read the dice from left to right.

Look up each five digit number in the Diceware list and find the word next to it. For example, 21124 means your next passphrase word would be "clip". When you are done, the words that you have found are your new passphrase. Memorize them and then either destroy the scrap of paper or keep it in a really safe place. That's all there is to it!

Example

Suppose you choose a five word passphrase, as we recommend for most users. You will need 5 times 5 or 25 dice rolls. Let's say they come out as:

1, 6, 6, 6, 5, 1, 5, 6, 5, 3, 5, 6, 3, 2, 2, 3, 5, 6, 1, 6, 6, 5, 2, 2, and 4

Write down the results on a scrap of paper in groups of five rolls:

1 6 6 6 5 1 5 6 5 3 5 6 3 2 2 3 5 6 1 6 6 5 2 2 4

You then look up each group of five rolls in the Diceware word list by finding the number in the list and writing down the word next to the number. Your passphrase would then be: **cleft cam synod lacy yr**
